

Transportation
COLLABORATE. CONNECT. COMPLETE.

Global Engineering Service Provider
Energy. Environmental. Transportation. Water.

TRANSPORTATION FOR THE 21ST CENTURY

For decades we have grown our transportation engineering expertise by joining with clients like you to take on the challenges facing the industry and your organization. We know you must be sensitive to the needs of the community, monitor economic conditions, reach sustainability goals, and stay on top of changing regulations and public demands. We will be there, helping you deliver transportation systems that are dependable, economical, safe, and efficient.

Alternative Delivery Systems

We pay attention to your needs and explore all the options to tailor-design a solution that fit your requirements. We do this through a variety of delivery systems including Design-Bid-Build, "A + B" Bidding, Design-Build, and Construction Management at Risk/CMGC.

From Concept to Completion

We offer a wide variety of services to meet our clients' needs. Our planning services include concept reports, revenue stream implementation plans, change of access reports, environmental documents, permits and regulatory coordination, program management, and survey and mapping (LiDAR.)

Always conscious of our clients' budgets we provide value engineering studies, cost-based estimating and constructability reviews. After we have completed your project design we can also provide a wide range of construction management services including contract administration, construction observation, material testing, and claims evaluation and support.

SERVICES

Roads and Bridges

- Rural and Urban Roadways
- Expressways
- Continuous Flow Intersections (CFIs)
- Concrete Bridges
- Steel Bridges
- Accelerated Bridge Construction
- Prefabricated Bridge Elements and Systems
- Retaining Walls

Freeways and Interchanges

- System and Service Interchanges
- Managed Lanes
- Roundabouts

Traffic Management and Safety

- Traffic Analysis and Operational Studies
- Roadway Safety Audits
- Roadway Lighting, Signing, Pavement Marking
- Signalization
- Intelligent Transportation Systems (ITS)
- Maintenance of Traffic Plans

Multimodal Systems

- Rapid Transit
- Multi-use Paths and Bridges

Accelerated Bridge Construction Owner's Engineer

Independent Construction and Quality Manager

Engineering, Design, and Construction Administration for Bridge Renovation

Interstate Roadway Design

Roadway and Interchange Design

Construction Administration
Road Widening and Reconstruction

Construction Management Services and Owner's Engineer

Bridge Design
